

## Hound

### Greyhound

Long legged hounds of greyhound type were depicted on the walls of Ancient Egyptian tombs and it is thought that these were the prototype of the sighthounds. These dogs with athletic streamlined bodies and acute sight were soon popular throughout Europe for their hunting prowess. The Greyhound was developed in Britain and in the Middle Ages a law was passed stating the only royalty and nobility could hunt with greyhounds, such was their prestige. The Greyhound seen in the show ring is larger and heavier than the racing track greyhound. The sport of racing greyhounds was first held on an oval racetrack in 1926.

Breed Group	Hound
Vulnerable Breed	No
Size	Large
How much exercise?	Up to 1 hour per day
Length of coat	Short
How much grooming?	Once a week
Supposedly sheds?	Yes
Town or Country	Either
Type of home	Large House
Minimum garden size	Small/Medium
Lifespan	Over 10 Years

## Health Information

You may be aware that some breeds of dog and their crosses can be susceptible to inherited disease. Of course you want to be sure that the dog you choose is as healthy as possible, and you would like to know that it has not inherited any undesirable disease-causing genes from its parents. There is some help in that DNA tests for diseases in purebred dogs are available for some conditions in some breeds, but there are not very many such tests just yet! There are also, however, a number of clinical veterinary screening schemes that dog breeders can use to increase the probability of producing healthy puppies.

Details of the various screening schemes, both veterinary and DNA, that are available to breeders in the UK can be found at [www.thekennelclub.org.uk/doghealth](http://www.thekennelclub.org.uk/doghealth)

Potential dog owners should be aware that, at present, the application of various health screening results to breeding programmes is not always straightforward, and breeders may make choices for various reasons. A responsible breeder though, will always be willing to discuss relevant health issues with you. Breed clubs are often useful sources of breed-specific information.

## What Screening is relevant for the Greyhound?

There are not currently any veterinary screening schemes or DNA tests for disease relevant to this breed under the Assured Breeder Scheme, however you should still ask breeders and refer to breed clubs about health issues in the breed.
