

# Australian Terrier

The breed was probably developed from native British terriers taken to Australia by settlers in the 19th Century – It is thought that the Scottish Terrier, Skye and Cairn played their part in the breed's development. He was used by settlers to keep down rodents and other vermin in their new territory.

## What health screening is currently relevant?

Kennel Club Accredited Breeders must use, or are strongly recommended to use, the following screening schemes and/or advice for sires and dams:

There are not currently any veterinary screening schemes or DNA tests for disease relevant to this breed under the Assured Breeder Scheme, however you should still ask breeders and refer to breed clubs about health issues in the breed.

ACCREDITED BREEDER SCHEME
