

## CAVALIER KING CHARLES SPANIEL - since 1993 MULTIFOCAL RETINAL DYSPLASIA (MRD) OPEN REGISTER

### **Operation of the Open MRD Register**

This will relate to all breeds that have MRD listed by the BVA as a Schedule A condition under the BVA/KC/ISDS Eye Scheme. The Open Register will contain only those dogs that have been diagnosed as 'affected by MRD' (apart from Rottweilers and Hungarian Pulis which will list passes as well as failures as they are only tested for this condition). This listing contains the name of the dog and the date of examination. All examinations were performed under the BVA/KC/ISDS Eye Scheme unless otherwise stated. There are a number of dogs with conflicting diagnoses for MRD and, where this occurs, it is proposed that if the owners of these dogs wish to submit additional, original examination certificates then these will all be listed under the dog's name in chronological order of testing.

\*\* = AHT result                      \*\*\* = ECVO result
