

EQUIPMENT PANEL REPORT JANUARY 2019

Incident Book

The panel would like to thank the office for keeping us informed of incidents involving equipment. We hope they have found our input helpful.

Colour of Equipment

The subject of equipment colour has been raised with some panel members and on social media. Photographs have been published using an app that reports to show what a dog can see. The panel would like the council's view on this subject.

Equipment Review

The panel wish to confirm the dates for the review and what the limitations of this should be.

Contact Equipment

Following the discussions at the July council meeting we have submitted a proposal to standardise the height of the See saw.

The A frame will be considered in the review of equipment. The current regulations are in line with most other organisations both domestic and international.
