

A study is being carried out by the Kennel Club's Activities Health and Welfare Sub-Group in order to highlight incidents on agility equipment.

The aim of the study is to record any incidents that may occur during agility competitions and to analyse the data collected for research purposes. (Please note the judge's name & class number, etc. will be kept anonymous in any published reports).

Please list all specific incidents including the equipment involved, such as a dog coming off the top of the dog walk, or a dog getting caught up in the collapsible tunnel, etc.

There is no need to record anything you would consider as "normal" agility faults such as knocking down a pole, missed contacts, banking or paddling the long jump, etc. Feel free to explain the circumstances in more detail if you feel this helps to put the incident into context.

Please complete the form for all the classes you are judging (please ask for another form or forms if you need them).

Judge:	Weather Conditions:	
Date:	Ground Conditions:	
Ring Number:	Class:	
Course Length:	Height Category:	
No. of dogs in the class:	Equipment Supplier:	
Please add any explanatory notes you think may be helpful next to the equipment involved in an incident you have decided to record.		
Please tick each item of equipment that featured in the course.		
Hurdle	<input type="checkbox"/>	
Wall (if used)	<input type="checkbox"/>	
Rising Spread	<input type="checkbox"/>	
Tyre	<input type="checkbox"/>	
Long Jump	<input type="checkbox"/>
