

Brittany

Pedigree Breed Health Survey

Forms were received representing 57 living dogs & 5 deceased dogs.

Mortality results

A total of 5 deaths were reported, representing 0.09% of all deaths reported in the Pedigree Breed Health survey. The range of longevity for the Brittany was 3 years to 15 years. Table 1 shows the causes of death for the breed.

Table 1 The most common causes of death/reasons for euthanasia (N = 5 deceased dogs)

Cause of death
Aggression
Cancer - unspecified
Gastric tumour
Old Age
Poison

Morbidity results

The 57 live Brittanyys represented 0.13% of total dogs in the survey. The median age of live dogs for the breed was 4 years (Table 2). Of the 57 Brittany which the survey covers, 44 had reported no conditions and 13 reported affected by at least one condition (min = 1 condition(s), max = 3 conditions), giving a total of 18 incidents of conditions.

The gender, neuter status and age of neutering summary statistics for Brittany's are shown in Table 3. There were 51 dogs with responses for Body Condition displayed in Table 4.

The median age the dogs were first affected by a condition was 6 years (min = 0 years, max= 13 years, Figure 3). The ages for the most common conditions is displayed in Figure 4. Table 5 shows the frequency of occurrence of all reported disease conditions for the Brittany.

Table 2: The summary statistics for the dogs' current age when survey was completed

Number of Dogs	Mean age (years)	Median age (years)	Min age (years)	Max age (years)
57	4.81	4	0	14

Table 3: Gender, neuter status and age summary statistics for dogs where gender and neuter status was reported

Sex	Neuter status	Age known	Count	Mean age neutered (years)	Median age neutered (years)	Min age neutered (years)
Female	Neutered	Yes	13	3.15	1	0
Female	Not neutered	No	9	NA	NA	NA
Female	Unknown	No	4	NA	NA	NA
Male	Neutered	Yes	14	0.64	0	0
Male	Not neutered	No	16	NA	NA	NA
Male	Unknown	No	1	NA	NA	NA

Table 4: The body condition comment and the age of the dog when this comment was made

Body condition	Count	Mean age (years)	Median age (years)	Min age (years)	Max age (years)
No comment was made by vet	6	4.83	3	0	13
Normal	42	3.98	2	0	14
Somewhat overweight	2	6.50	6.5	4	9
Somewhat underweight	1	10.00	10	10	10

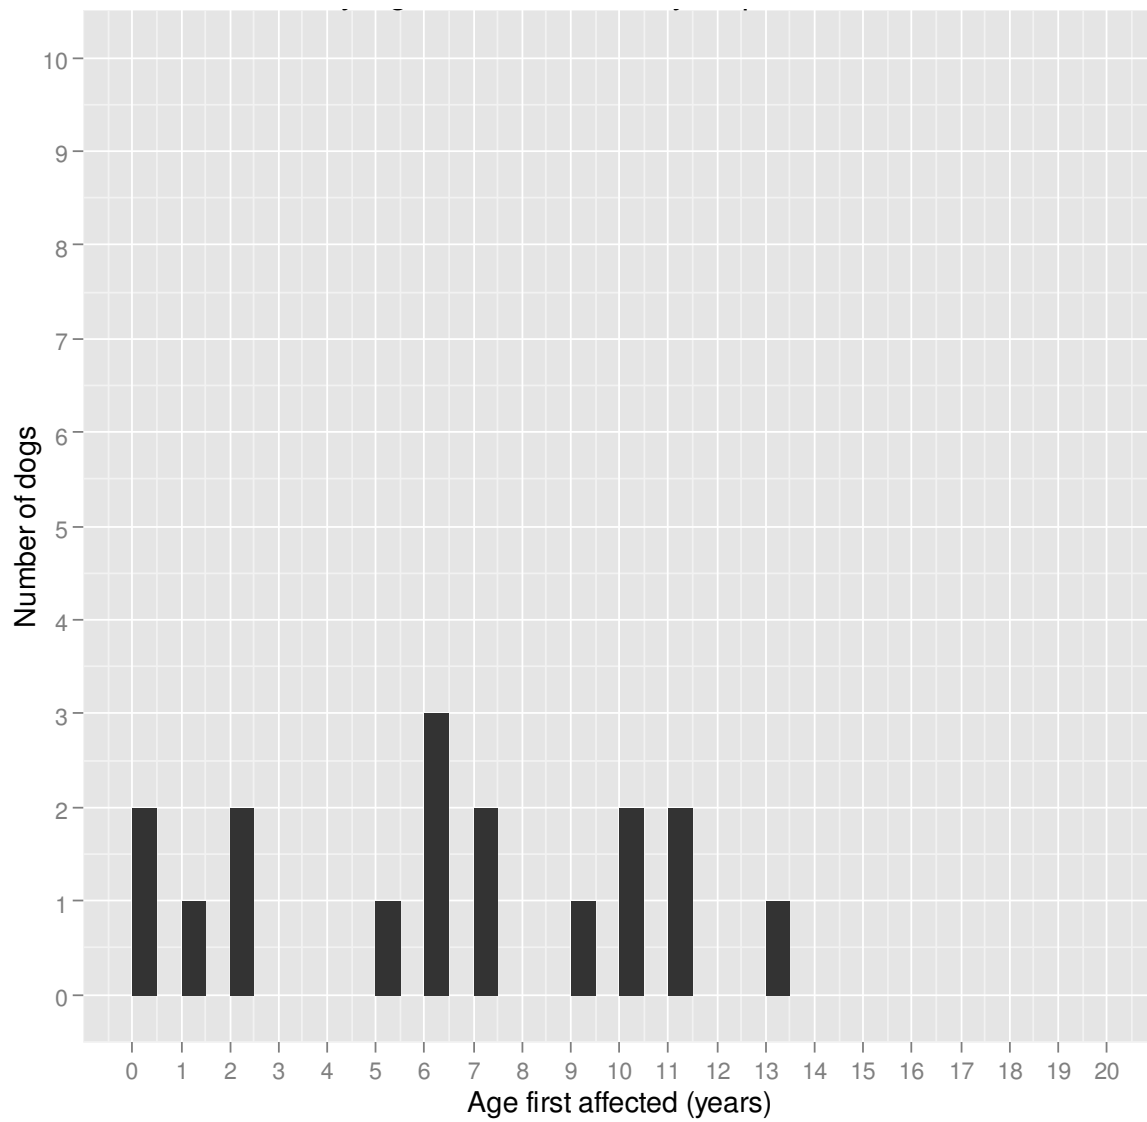

Figure 3: Histogram showing frequency of known age at diagnosis for the disease conditions reported

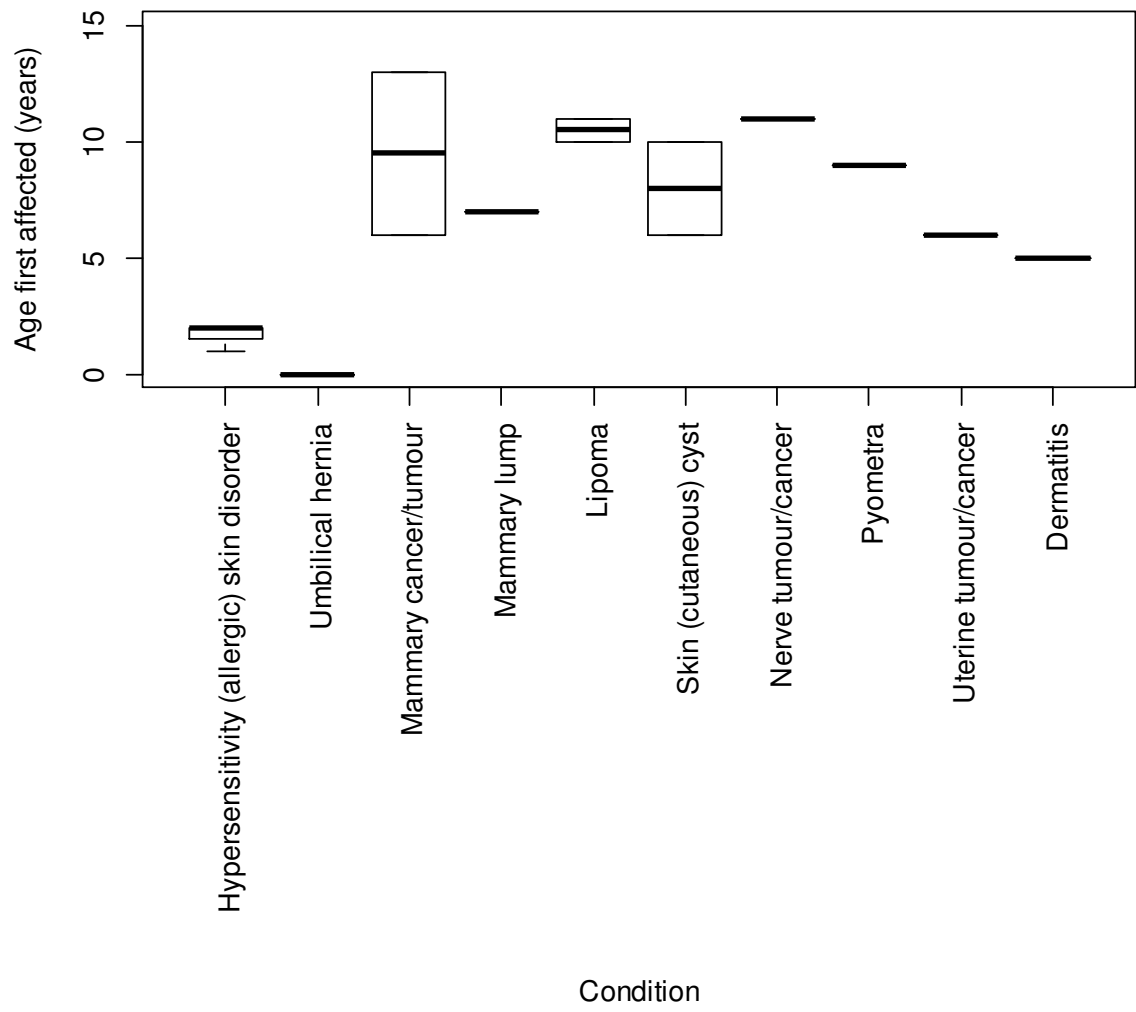

Figure 4: Box and whisker plot of age at diagnosis in years for the most common disease conditions in descending order. The solid line within each box represents the median age at diagnosis from the condition. The box represents 50% of the dogs and the whiskers represent 95% of the dogs for each condition. The circles (o) represent possible outliers

Table 5: The most commonly reported disease conditions in descending order for the breed (N = 57 live dogs)

Condition	Number of cases of disease	Proportion (%)	Prevalence (%)
Hypersensitivity (allergic) skin disorder	3	16.67	5.26
Lipoma	2	11.11	3.51
Mammary cancer/tumour	2	11.11	3.51
Mammary lump	2	11.11	3.51
Skin (cutaneous) cyst	2	11.11	3.51
Umbilical hernia	2	11.11	3.51
Dermatitis	1	5.56	1.75
Irregular Heart beat	1	5.56	1.75
Nerve tumour/cancer	1	5.56	1.75
Pyometra	1	5.56	1.75
Uterine tumour/cancer	1	5.56	1.75

Proportion of morbidity as %= N/18 conditions, prevalence %= N/57 live dogs

Summary

From the dogs surveyed, most Brittany's were not affected by a disease condition (77.19%). The most commonly reported disease condition in live dogs was hypersensitivity (allergic) skin disorder. All reported cause of death affected an equal proportion of the reported deaths.
