

## **Cesky Terrier**

### **Pedigree Breed Health Survey**

Forms were received representing 22 living dogs & 6 deceased dogs.

#### **Mortality results**

A total of 6 deaths were reported, representing 0.11% of all deaths reported in the Pedigree Breed Health survey. The range of longevity for the Cesky Terrier was 9 years to 12 years. Table 1 shows the causes of death for the breed. Age at death is presented for the most common causes in Figure 2.

**Table 1** The most common causes of death/reasons for euthanasia (N = 6 deceased dogs).

<b>Cause of death</b>
Kidney failure
Gastric tumour
Lymphoma
Pyometra
Unknown

#### **Morbidity results**

The 22 live Cesky Terriers represented 0.05% of total dogs in the survey. The median age of live dogs for the breed was 5.5 years (Table 2). Of the 22 Cesky Terriers which the survey covers, 16 had reported no conditions and 6 reported affected by at least one condition (min = 1 condition(s), max = 4 conditions), giving a total of 13 incidents of conditions.

The gender, neuter status and age of neutering summary statistics for Cesky Terriers are shown in Table 3. There were 16 dogs with responses for Body Condition displayed in Table 4.

The median age the dogs were first affected by a condition was 5 years (min = 0 years, max = 10 years). Table 5 shows the reported disease conditions for the Cesky Terrier.
