

German Longhaired Pointer

Pedigree Breed Health Survey

Forms were received representing 6 living dogs & 0 deceased dogs.

Mortality results

There were no reported deceased German Longhaired Pointers.

Morbidity results

The 6 live German Longhaired Pointers represented 0.01% of total dogs in the survey. The median age of live dogs for the breed was 5.5 years (Table 2). Of the 6 German Longhaired Pointers which the survey covers, 4 had reported no conditions and 2 reported affected by at least one condition (min = 1 condition(s), max = 3 conditions), giving a total of 4 incidents of conditions.

The gender, neuter status and age of neutering summary statistics for German Longhaired Pointers are shown in Table 3. There were 4 dogs with responses for Body Condition displayed in Table 4.

The median age the dogs were first affected by a condition was 3.5 years (min = 0 years, max= 8 years). Table 5 shows the reported disease conditions for the German Longhaired Pointer.

Table 2: The summary statistics for the dogs' current age when survey was completed

Number of Dogs	Mean age (years)	Median age (years)	Min age (years)	Max age (years)
6	5	5.5	0	10

Table 3: Gender, neuter status and age summary statistics for dogs where gender and neuter status was reported

Sex	Neuter status	Age known	Count	Mean age neutered (years)	Median age neutered (years)	Min age neutered (years)	Max age neutered (years)
Female	Neutered	Yes	3	4.33	6	1	6
Female	Not neutered	No	1	NA	NA	NA	NA
Male	Not neutered	No	2	NA	NA	NA	NA

Table 4: The body condition comment and the age of the dog when this comment was made

Body condition	Count	Mean age (years)	Median age (years)	Min age (years)	Max age (years)
Normal	4	5.00	5	0	10

Table 5: The most commonly reported disease conditions in descending order for the breed (N = 6 live dogs)

Condition
Elbow dysplasia
Entropion
Intervertebral disc disorder
Lipoma

Summary

From the dogs surveyed, most German Longhaired Pointers were not affected by a disease condition (66.67%). All reported disease conditions represented an equal proportion of live dogs. There were no reported deaths.
