

# Large Munsterlander

The Large Munsterlander was developed on the same root stock as the German Long Haired Pointer but selective breeding embedded the black/white colour as the breed's hallmark. He is an excellent versatile gundog. The first breed club was founded in Germany in 1919 and the breed was recognised by the Kennel Club in 1971.

## What health screening is currently relevant?

Kennel Club Accredited Breeders must use, or are strongly recommended to use, the following screening schemes and/or advice for sires and dams:

- **BVA/KC Hip Dysplasia Scheme**
- **Eye testing**

ACCREDITED BREEDER SCHEME
