

Miniature Schnauzer

The original Schnauzer has been known in Germany from at least the 14th Century. It is thought that the miniaturisation was brought about by the infusion of Affenpinscher blood. The miniature variety was first officially recorded in 1888. Despite the reduction of size, there is no reduction in spirit – and they are hugely popular as companion dogs.

What health screening is currently relevant?

Kennel Club Accredited Breeders must use, or are strongly recommended to use, the following screening schemes and/or advice for sires and dams:

- **Eye testing**
- **BVA/KC/ISDS Eye Scheme - Litter Screening**

ACCREDITED BREEDER SCHEME
